

WHY FREUDENBERG XPRESS?

QUALITY IN RECORD TIME

- **Fast delivery** for maintenance and repair demands – if necessary within 24 hours
- **Long durability** – due to unique material properties
- **No machined sealing edge** – trimming process identical to series production
- **Best surface** – specially developed turning tools with a maximum finish quality of Ra 2,38µm
- **Unique tolerances** – e.g. O-rings according to ISO 3601-1:2008

ORIGINAL FREUDENBERG MATERIALS AND PROFILES

- **Original profiles and materials** of series production (PU, PTFE, elastomers) and Freudenberg catalogue items
- Own developed special material in addition to series production
- **Best leakage values** compared to competitors
- Elastomer materials processible from 70 Shore A
- Access to Freudenberg original drawings
- Own developed software to machine „RMS“ (Rapid Machined Simmerring)

CUSTOMIZED SEALS AND FORMED PARTS

- Unique turning and milling technology – for individual sealing designs
- Prototyping
- Reproduction based on drawings and samples
- Waiver of expensive tools to save costs
